

(B) PROGRAM SPECIFIC OUTCOMES (PSOs)

Department of ECE

Program shall specify 2-4 program specific outcomes.

- PSO1:** Apply basic knowledge related to electronic circuits, VLSI, communication systems, signal processing and embedded systems to solve engineering/societal problems.
- PSO2:** Design, verify and authenticate electronic functional elements for a different applications, with skills to interpret and communicate results.
- PSO3:** Engineering and management concepts are used to analyze specifications and prototype electronic experiments/projects either independently or in teams.
