Career Planning & Placement Drives: IV Year Students-2013-2014

Dear Parents,

This is to bring it to your kind notice that your ward has not being showing interest on the career planning and placements drives despite efforts put in by our placement team and HODs in counseling them to attend all the events concerning placements drives that are arranged in the college. Very recently the Institution happened to conduct the orientation program on career planning, placement drives and placements education by renowned industry delegates, which was very fruitful. But to our despair many students were absent for this Important program despite information conveyed to all the students well in advance. It certainly hurts the interest of the institution's effort when student don't respond to the important programs. Please ensure your ward attends all such training programs whenever they are arranged by the college. The institution is taking utmost care and giving top priorities for placement drives in renowned MNCs. These programs are conducted exclusively for this college students and all the expenditure on these activities are borne by the institution and no burden is levied on students.

Further, With regard to our last meeting on 2nd December, our training & Placement program 'CAREER - PLANNING & PLACEMENTS' - Student's attention is drawn to the fact that the CRT Training Program is a mandatory requirement for allowing them all into the participation of any campus recruitment process. i.e they will not be allowed to any campus recruitment Drives if they do not fulfill in participating in this CRT Training Program.

Students not attending these classes will not be supported for any placement activities.

We wish to bring out our forth coming Training programs as below:

1. Hardware and Networking with MCITP. 2.   Mobile Apps development with .Net.

Communicative English & Soft skills:

· Basic English Grammar. Group Discussions., Interactive Sessions.
· Translational Skills, Body Language.
