**Department of Electrical & Electronics Engineering
Aluminous – Guest Lecture Report**

Speaker Details:

Name: A.Likhitha
Designation: Project Engineer
Company Name: Accenture
Mail id: Annathalikhitha@gmail.com
Ph Number: 8309004756
Topic: Career Guidance after B.Tech
Date: 09/07/2022
Venue: Placement Wing-II
No. of students attended: 45

Academic Year: 2022-23

Minute of Meeting:

Respected HoD, Mr J.Rakesh introduced the speaker of the session. Ms A.Likhitha, is one of the best alumni of EEE Department, SICET who got B.Tech degree from SICET in the Year 2022. She was very good student during her academics. On request of department alumni coordinator, she visited the department and addressed the students. The present IV year students attended the talk of her and were inspired a lot with her words. She shared her experience during his studies in SICET from the bottom of her heart. She motivated students and given very good suggestions to them and assured them she is always ready to help them in any manners for the growth of their career. The students also interacted with her and shared their present experience. She mentioned the importance of curriculum of the department. The session went for nearly 2 hours and she is willing to address many students like this in future also. Finally, the HoD appreciated the speaker and has given the vote of thanks.

Report on Centre of Excellence (CoE) in VLSI Design Department of ECE

Sri Indu College of Engineering and Technology

Very-large-scale integration (VLSI) is the process of creating an integrated circuit (IC) by combining thousands of transistors into a single chip. Now –a – days a Smartphone can do the job of a whole collection of gadgets. It's a phone, camera, camcorder, Walkman, watch, wallet (carrying digital cash), radio, GPS, TV, VCR, and computer all in one. Still, we may wonder how all these functions can fit into such a small mobile.

There are several job opportunities in the semiconductor industry in India and abroad in various categories of VLSI Design. Hence, Centre of Excellence in VLSI Design was established in Sri Indu College of Engineering and Technology on 05th May 2019 to support all interested students to get into a career in VLSI Design.

Under the aegis of CoE in VLSI Design, several activities were conducted to groom the students to gain expertise in this domain. The details are given in this report.

1) Interaction session with Mr.Fiaz , TLC group on 01/10/2019

Mr. Fiaz Is an alumni of Sri Indu, He shared his valuable experience as a student from our department. Based on his experience in challenging career opportunity currently in VLSI Design. He has given all tips and tricks to students so as to acquire required Knowledge to get into VLSI Domain.

Report on Guest lecture on “**Career guidance and Introduction to Analytics**”

Speaker Name: Mrs.Nandini TCS company Adibatla. She is Alumna of SICET

A brief report on the topics discussed:

Today world is incomplete without data. If this data can be somehow analyzed and interpreted to capture what the users want and make innovations. We could bring in a revolutionary system where businesses can provide state-of-the art solutions to the problem faced by a common man and that too at low costs. This system can improvise and improve itself to be more innovative by the day.

Analytics is the discovery, interpretation, and communication of meaningful patterns in data. Especially valuable in areas rich with recorded information, analytics relies on the simultaneous application of statistics, computer programming and operations research to quantify performance.

Analytics in our own words is the process of discovering, interpreting, and communicating significant patterns in data. . Quite simply, analytics helps us see insights and meaningful data that we might not otherwise detect.

Professionals in the field of analytics use a variety of computer programming languages to help them work with data. Computer programming is used to scrape and mine data, to sort and analyze data for preprocessing, and of course, is also used to conduct the analytics computations themselves.

A Data analyst role is not necessarily an IT job but requires working with IT tools and systems. Data analysis involves using statistical and computational techniques to derive insights from data, which can be applied in various industries such as healthcare, finance, marketing, and more

It involves collecting, cleaning, organizing, visualizing, and interpreting data to draw meaningful conclusions about the data. Business analytics is used across various industries to identify trends, develop strategies and optimize processes for improved performance.

Analytical skill is the ability to deconstruct information into smaller categories in order to draw conclusions. Analytical skill consists of categories that include logical reasoning, critical thinking, communication, research, data analysis and creativity.

Four main types of data analytics

- ❖ Predictive data analytics. Predictive analytics may be the most commonly used category of data analytics.
- ❖ Prescriptive data analytics.
- ❖ Diagnostic data analytics.
- ❖ Descriptive data analytics.

Data analytics is the science of analyzing raw data to make conclusions about that information. Data analytics help a business optimize its performance, perform more efficiently, maximize profit, or make more strategically-guided decisions.

Data Science:

Data science is the study of data to extract meaningful insights for business. It is a multidisciplinary approach that combines principles and practices from the fields of mathematics, statistics, artificial intelligence, and computer engineering to analyze large amounts of data.

Data Visualization: Results of data science are displayed in the form of visually appealing diagrams, charts and graphs which makes it simple to view and understand.

Statistics: Statistics deals with the collection, analysis, interpretation and presentation of data through mathematical methods.

Machine Learning: this is an essential component where we use intelligent algorithm that learn on their own and predict human behavior as accurately as possible.

Sub: Placement Auditorium for SPLASH 2K18 Reg:-,

Respected sir,

We, E.Parshuram , Associate Professor department of ECE would like to request your kind approval to conduct “SPLASH 2K18” on 02nd November 2018 in front of ECE block from 10.30AM to 01.00PM.

Kindly do the needful.

Thanking you

Yours Sincerely
E.Parshuram

SCHOLARSHIPS

SICET ALUMNI ASSOCIATION - POOR MERIT SCHOLARSHIPS

ATTENTION: ALL B.TECH STUDENTS

Applications in prescribed proforma are invited from eligible students for the grant of SICET Alumni Association sponsored financial assistance for economically poor students.

Financial Grant of Rs.8,500/- will be awarded to ONE STUDENT from EACH BRANCH in EACH YEAR to further the academic pursuits of the student.

CRITERIA

- Award is open to all students with a minimum of 60% marks in aggregate without any backlogs.
- Parental annual income less than Rs.50,000/-
- In case of equal marks secured by students, attendance in the previous year/semester will be taken into consideration.
- EAMCET rank is the criterion for I year students.
- The scholarships will be presented at the Republic Day function on 26 January.

NOTE:

- Application forms can be had from the Office of Dean Student Affairs from 17 January onwards and the completed application forms should be submitted at least two days before Republic Day (26 January).
- The application form should be countersigned by the concerned HOD.
- Attested photocopies of marks sheets and Income certificate are to be enclosed.
