CHAIRMAN'S MESSAGE

I strongly believe in the message given by Swami Vivekananda where he defines that “Education is the life-building, man-making character-making, assimilation of ideas”. It is from this perspective, as the Chairman of Sri Indu Group of Institutions, I have been striving hard towards making this Group a better academy by providing its community of students and teachers with innovative, challenging ways to think about what they are doing and by allowing them to figure out the best ways to accomplish their goals. During the past four decades, there has been a phenomenal expansion of technical education facilities in the country. The growing body of scientific and technical knowledge and its repeated obsolescence call for more frequent occupational updations. Education has to be provided to all, and at the same time, the quality of education has to be maintained, irrespective of the quantitative expansion of study.

It gives me immense joy to affirm that Sri Indu group of institutions, having completed 43 years successfully, has grown into one of the best institutions and is rated as one of the leading Groups in Hyderabad, Telangana State. Sri Indu group of institutions is a multi-campus academic unit spread over Vanastalipuram, Vaidehi Nagar, Sheriguda in Hyderabad and three more Academic Institutions in Dubai, Doha and Wukair, thus making this Group an Academy of International rank and grade. While Vanasthalipuram campus houses Loyola Group of Schools, established in 1979, Vaidehi Nagar campus accommodates PG College and Sheriguda campus accommodates for Two Engineering Colleges, College of Pharmacy and PG College MBA (OU).

Both of our Engineering Institutions in Sheriguda , SICET and SIET are Autonomous Institutions under UGC, Recognized under 2(f) and 12(B) of UGC Act 1956, approved by the All Indian Council of Technical Education (AICTE), Accredited by NBA and NAAC and an ISO 9001:2000 Certified College and Permanently Affiliated to JNTUH.

Engineering education has become synonymous with a better standard of living. Besides the acquisition of technical skills, the need of getting oneself familiarized with soft skills like communication skills, organizational skills, crisis management skills, public relations skills etc. has gained appreciable momentum. I am striving very hard to mould Sri Indu Group as the model Institution in not merely getting the students prepared for the potential job market but also instilling in them much needed enthusiasm to work for the nation to meet the social aspirations of our country. I strongly believe that the engineers of today, by their innovative ideas, their problem-solving attitude and, of course, a humanitarian bent of mind, can establish a better world where people of all nations may live in harmony and peace. By and large, I express my deep sense of commitment to the overall development of the student community of Sri Indu Group of Institutions.

Sri. R. Venkat Rao, Chairman

SECRETARY'S MESSAGE

Education must be conceived as an interdisciplinary concept as a factor of multidimensional development, of which, man is both the end and the instrument. Education so conceived helps in the continual growth of personality, steady development of character and qualitative improvement of life. More and more objective and scientific methods of quality determination and evaluation have to be adopted in institutions of higher learning. This can be achieved under the guidance of a competent, qualified, experienced and responsible head of the institute.

It gives me immense pleasure and I feel proud in stating that Sri Indu Group of Institutions which have completed 45 years successfully under the leadership of its Chairman, an eminent academician, who always operates with a vision towards the development of an institution. He is as much instrumental as the engine of a train.

Our laboratories are well-equipped with state-of-the-art equipment and all the computer Labs in the campus are high-end configuration, Wi-Fi enabled Campus with internet facility. The most modern and high-tech Central Library with national and international journals and magazines, and online journals like IEEE, ASME and J-Gate certainly create a congenial ambience for an ideal engineer in the making to grow.

I am really happy that despite the slowdown of the economy, Sri Indu has succeeded in bringing various good companies to its campus for placements. Sri Indu Group believes in bridging the gap between Industry and Research for the students who joined to make them apt for facing the challenges of industry and society

SOFT SKILLS TRAINING

In the present world largely driven by the service industry, soft skills are much sought after, especially by IT companies. Very often recruiters, because of the absence of these skills, reject the majority of the candidates. As we are all aware, the undergraduate years coincide with the most impressionable age of the students where their attitudes are developed and preferences & interests formed. Therefore before stepping into the world of work, students require proper initiation and the right personality. Personality enhancement programs at our college are thus exclusively designed to prepare entrepreneurial, learnable and employable students.
