

Extension/Outreach Programmes

Dept. of Humanities & Basic Sciences
Sri Indu College of Engineering & Technology,
Hyderabad

The **Campus Outreach Programme** initiated by the Department of Humanities and Basic Sciences aims to bridge the gap between academic learning and real-world application. This programme is designed to enhance students' awareness, social responsibility, and professional readiness through meaningful engagement beyond the classroom.

Under this initiative, students are encouraged to participate in activities such as awareness drives, community service, environmental campaigns, educational workshops, and collaborations with local schools or organizations. These experiences help students develop communication skills, leadership qualities, and a deeper understanding of societal needs.

By promoting active involvement with the broader community, the Campus Outreach Programme fosters holistic development, cultivates empathy, and instills a sense of civic responsibility—core values that align with the mission of Sri Indu College of Engineering and Technology.

List of Campus Outreach Programmes

I. Awareness Campaigns

- Health and hygiene awareness
- Road safety and traffic rules
- Anti-drug and anti-ragging awareness
- Digital literacy campaigns in rural areas
- Electoral Rights Awareness

II. Community Service Initiatives

- Village adoption for educational and sanitation support
- Cleanliness drives (Swachh Bharat Abhiyan)
- Tree plantation and environmental conservation activities
- Blood donation and health check-up camps

III. Educational Outreach

- Teaching support in government schools
- Career guidance and motivational sessions for school students
- Science and mathematics demonstrations for rural children

1. Environmental Awareness Programme

The Department of Humanities and Sciences conducted an **Environmental Awareness Programme** aimed at promoting environmental consciousness among students and faculty. The event focused on the urgent need to protect and preserve the environment through sustainable practices and individual responsibility.

As part of the programme, guest lectures were delivered by environmental experts who spoke on topics such as climate change, pollution control, waste management, and conservation of natural resources. Students participated enthusiastically in various activities including essay writing, poster making, and a campus cleanliness drive.

The event served as a platform to encourage eco-friendly habits and instill a sense of responsibility towards nature. Overall, the programme was a great success in spreading awareness and inspiring the college community to contribute to a greener, healthier planet.

2. Dengue Awareness Programme

The Department of Humanities and Sciences organised a **Dengue Awareness Programme** to educate students and staff about the causes, symptoms, prevention, and control of dengue fever. The programme aimed to spread awareness on maintaining hygiene and preventing mosquito breeding, especially during the monsoon season.

Health experts were invited to deliver informative talks on the transmission of dengue, early detection of symptoms, and the importance of seeking timely medical care. Students actively participated in awareness activities such as poster presentations, rallies, and cleanliness drives focused on eliminating stagnant water sources.

The programme successfully raised awareness about dengue prevention and emphasized the importance of community participation in controlling the spread of the disease. It encouraged everyone to take proactive measures to safeguard their health and support a dengue-free environment.

Awareness on Child Labour and Importance of Child Education

The Department of Humanities and Sciences organised an **Awareness Programme on Child Labour and the Importance of Child Education** to highlight the critical issues surrounding child exploitation and the transformative power of education. The event aimed to sensitize students and staff about the harsh realities of child labour and the need to ensure every child's right to education.

The programme featured talks by social activists and educators who discussed the causes and consequences of child labour, along with government policies and legal frameworks for child protection. Students took part in various awareness activities such as slogan writing, poster making, and a street play to spread the message within and beyond the campus.

This initiative encouraged participants to be socially responsible citizens and advocates for child rights. The programme successfully emphasized that education is the key to ending child labour and building a better future for every child.

ADDRESSING CROSS CUTTING ISSUES

The Department of Humanities and Sciences plays a vital role in addressing cross-cutting issues by integrating themes such as gender equality, social inclusion, environmental sustainability, ethics, and digital literacy into its curriculum and activities. These issues often include gender equality, environmental sustainability, social inclusion, ethics, and technological advancement. Addressing these concerns holistically ensures that HEIs not only deliver quality education but also promote equitable, responsible, and sustainable development in line with global standards and societal needs. Through interdisciplinary teaching, research, and community engagement, the department fosters awareness and critical thinking around these issues, preparing students to become socially responsible and ethically conscious individuals. By embedding these cross-cutting concerns into academic programs and campus initiatives, the department ensures that graduates are equipped not only with technical knowledge but also with the values and skills necessary to contribute positively to society and tackle complex global challenges.

Objectives:

- **Promote Inclusivity and Equality:** Ensure equal access and opportunities for all students and staff regardless of gender, background, or social status.
- **Enhance Awareness and Sensitivity:** Foster understanding of critical social, environmental, and ethical issues among the academic community.
- **Integrate Sustainable Practices:** Embed principles of environmental sustainability and responsible resource use within institutional operations and curricula.
- **Encourage Ethical Conduct:** Cultivate a culture of integrity, accountability, and respect across teaching, research, and administrative processes.

- **Support Holistic Development:** Prepare graduates to be socially responsible citizens who can address complex challenges in diverse professional and community settings.
- **Strengthen Institutional Resilience:** Build adaptive and inclusive systems that respond effectively to evolving societal and global challenges
